SUMMARY

Android Developer with 3 years of experience building scalable, production-grade applications using Kotlin and Java. Currently at Zoho Corporation, shipping high-impact features for 100K+ users. Strong expertise in MVVM, Clean Architecture, performance optimisation, and REST API integrations.

EXPERIENCE

Zoho Corporation

Jul 2023 – Present

Software Development Engineer

Chennai, India

- Engineered a unified social media integration (Instagram, Twitter, Facebook) within Zoho Desk, consolidating customer support channels and reducing agent context-switching.
- Built a real-time dynamic field computation engine that evaluates dependent field values via live API calls and local DB sync, eliminating manual data re-entry and ensuring consistency across specific field types.
- Refactored existing layouts and custom views to support RTL rendering in Zoho Desk, expanding the app's reach to Arabic and Hebrew-speaking markets.
- Achieved WCAG compliance and integrated TalkBack support across key user flows, making Zoho Desk accessible to users with visual and motor disabilities in line with Google's accessibility standards.
- Developed and maintained features for an internal reusable Android component library powering dynamic, user-configurable field display layouts — including drag-and-drop reordering, multi-layout support, and advanced styling options — shipped across multiple Zoho mobile applications.

Zoho Corporation

Apr – Jun 2022

Summer Intern

Chennai, India

- Developed a Ticket Booking System console application using Java and Kotlin.
- Implemented algorithms for seat allocation and train scheduling.
- Applied OOP and SOLID principles for modular, maintainable code structure.

PROJECTS

SociableX | Kotlin, Java, MVVM, Clean Architecture, Coroutines, Room, Hilt | [GitHub](#)

- Developed a feature-rich social media Android app with search, hashtag and location-based photo viewing, profile sharing, real-time messaging, and biometric app locking.
- Used Coroutine Worker for background task scheduling; followed MVVM and Clean Architecture for scalable, testable code.

E-Commerce Web Application | Spring Boot, Spring Security, JPA, Hibernate, JWT, AWS

- Built a complete eCommerce backend with modules for Product, Category, Authentication, Cart, Order Management, and Payment.
- Implemented JWT-based authentication with role and permission management for fine-grained access control.
- Integrated pagination and sorting for scalable product and order listings; used Lombok to reduce boilerplate.

TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Android SDK, Jetpack (ViewModel, LiveData, Room, Navigation, WorkManager), Retrofit, Coroutines, Hilt/Dagger

Architecture: MVVM, Clean Architecture, Repository Pattern

Tools & Platforms: Android Studio, Git, Firebase, REST APIs, Postman, AWS

Other: Spring Boot, JPA, Hibernate, JWT, SQL

EDUCATION

Vel Tech University

2019 – 2023

Bachelor of Technology, Computer Science and Engineering | CGPA: 8.6/10

Chennai, India

ACHIEVEMENTS

- Solved **350+** coding problems on LeetCode, GeeksforGeeks, and Code360.
- Mentored students in Java and Data Structures & Algorithms (DSA) as part of a college programming club.
